

# NUOVA Hi-G ITALIA

## Ultraminiature Relays

**Nuova Hi-G Italia** has more than 30 years experience in manufacturing high quality hermetically sealed relays to meet military and aerospace specifications and applications.

**Nuova Hi-G Italia**, with a range of relays up to 15 amps switching has one of the largest range of Mil and CECC qualified relays products in the world.

Nuova Hi-G Italia offers a completely interfaced and fully integrated organisation with a total capability for manufacturing and design, with fully equipped and up to date test and reliability laboratories, calibration facilities, purchasing, sales, distribution, administration etc... all harmonised in a Quality System that is approved and qualified to ISO 9000 and AQAP.

Production facilities are designed for maximum cleanliness. This includes a dust control room where relays are assembled under laminar flow benches and a white room (class 1000) where operations such as cleaning, testing and sealing are performed.

Nuova Hi-G Italia high reliability relays have been used for space applications and qualified in accordance with ESA / SCC (European Space Agency) specifications, the first manufacturer in Italy for electronic components to gain such approval.

Nuova Hi-G Italia hermetically sealed relays offers the following benefits

- SPDT, DPDT and 4PDT configurations
- Exceptional tolerance to shock and vibration
- Leak-free sealing and extended life expectancy
- Sensitive from 25 to 500 milliwatts
- Wide selection of coil resistance's, terminations and mounting, including SMD

The catalogue is divided into the following main product groups

-Military, Aerospace and CECC types

-Commercial and Industrial types

-Radio frequency types

-Customized Timers

**Warranty:** We guarantee our products for 12 months from delivery, providing material as supplied to the specifications listed on this catalogue, has not been modified, either electrically or mechanically. Modification of materials will void warranty and /or return policies.

Specifications noted herein are subjected to change without notice.

# GENERAL INFORMATION

## APPROVALS

CECC (CENELEC Electronic Components Committee) - All relays supplied with this registered Mark, have been subject to rigid inspection for quality conformance and a comprehensive schedule of test and acceptance requirements, under the surveillance of the independent inspectorate: ISTITUTO ITALIANO DEL MARCHIO DI QUALITA'

### MIL

All relays supplied as compliance with Military Specification reference, have been subject to rigid inspection for quality conformance and a comprehensive schedule of test and acceptance requirements, in accordance to National military standard (NK-2C) and specification (i.e. Mil-PRF-39016), under the surveillance of the Italian MINISTRY of DEFENCE, D.G. TELEDIFE (previously TELECOMDIFE)

## MAIN PRODUCT SELECTION

The catalogue is divided into three main product groups: Qualified or compliant **Military** Types and qualified **CECC** Types, **Commercial** Types, **RF** Types.

The Relay Selector Chart on next page will enable you to easily choose the relay that is the best suited to meet your particular requirements.

### MILITARY and CECC QUALIFIED RELAYS

Nuova HI-G Italia offers a complete selection of CECC and Military relays qualified to or compliant with the latest specification, providing excellent reliability. Our relays are used world-wide in military and aerospace systems, civil aviation, satellites, including navigation control systems, engine management and control equipment. Where individual requirements demand design and testing that is not available within the military and CECC specifications listed here, Nuova HI-G Italia has the capability to modify existing devices to meet those needs.

### COMMERCIAL and INDUSTRIAL RELAYS

Nuova Hi-G Italia offers a wide variety of commercial, industrial and special design relays, to meet the needs of customers whose applications require the advantages of qualified relay type, but who are unable to find a device within the military and CECC specifications. These devices operate reliably under extreme environmental conditions and are designed to survive where other competitive relays may not.

### RADIO FREQUENCY RELAYS

Although all Nuova HI-G Italia relays can be used to switch radio frequency loads, the RF types provides the user with switching poles terminated with coaxial cable. Two-pole devices are available with either one or both sets of poles cabled. When only one set of poles is cabled on a two-pole relay, the other set is available for use with pin or hook termination.

### CUSTOM RELAYS

Nuova Hi-G Italia has the capability to provide custom design relays upon customer requirements. These relays includes a multitude of mounting (Brackets, Insulator Pads, Spreaders and Stand-offs), terminations, electrical parameters, with selective testing at our own laboratories.

#### Note:

All relays can be shipped with certificate of conformance and test data record for individual relay or batches of relays, upon customer requirement.

# GENERAL INFORMATION RELAY TERMINOLOGY and SYMBOLS

<b>Armature</b>	The moving magnetic member of an electromagnetic relay structure
<b>Capacitance</b>	The maximum allowable capacitive coupling between two specified test points
<b>Coil Voltage (maximum)</b>	The maximum coil voltage which can be applied to the coil over the temperature range, without damaging the coil.
<b>Contact (Form C)</b>	Break before Make, or Transfer
<b>Contact Bounce</b>	Intermittent and undesired opening of closed contacts or closing of open contacts, of a relay.
<b>Contact Bounce Time</b>	For a contact which is closing (opening) its circuit, the time interval between the instant when the contact circuit first closes (opens) and the instant when the circuit is finally closed (opened).
<b>Carry Current</b>	The amount of current which can safely flow through closed contacts, when the contacts are opened and closed with no load applied.
<b>Cycle</b>	One opening and one closure of a contact set
<b>DPDT</b>	Double Pole Double Throw relay
<b>Drop-out Value</b>	A monostable relay drops out when it changes from an energized to an unenergised condition.
<b>Isolation</b>	The value of insulation resistance, dielectric strength and capacitance measured between the input and outputs. The leakage of an RF signal between mutually isolated points.
<b>Low level Load</b>	Load level which will have minimal effect on contact life and performance.
<b>Nominal Coil Voltage</b>	The coil voltage at which the relay is intended to operate.
<b>Operate Time</b>	The interval of time between the application of the operate value and the first closing (or opening) of the contact circuit.
<b>Pick-up (Pull-in)Value</b>	As the current or voltage on an unoperated relay is increased, the minimum value at which all contacts will change state.
<b>Release Time</b>	The interval of time between the application of the release value and the first opening (or closing) of the contact circuit.
<b>SPDT</b>	Single Pole Double Throw relay.
<b>Crosstalk</b>	The electrical coupling between a closed contact circuit and other open or closed contacts on the same relay or switch, expressed in decibel down from the signal level.
<b>Contact Stabilisation time</b>	The interval of time, following operate or release time, to reach and maintain the static contact resistance value of the relay. It is the sum of the contact bounce time and the time for dynamic contact resistance to stabilise to the static contact resistance
<b>VSWR</b>	Voltage Standing Wave Ratio. A measurement of the reflected RF signal.

# GENERAL INFORMATION

## RELATIONSHIP OF RELAY PERFORMANCE TO DEFINITIONS

**Maximum coil voltage  
or current**

**Nominal coil voltage  
or current**

(relay must operate)

**Pick-up, max. specified**

(relay may or may not operate)

**Pick-up, min. specified**

(relay must not operate)

**Increasing coil voltage  
or current**

Operated position

Operation undefined

Unoperated position

(relay must remain operated)

**Drop-out, max. specified (hold)**

(relay may or may not Drop out)

**Drop-out, min. specified**

(relay must drop-out)

Decreasing coil voltage  
or current

## CROSS REFERENCE NUOVA Hi-G vs Military Part Numbers

Nuova Hi-G Italia has qualified its products in accordance with MIL-PRF-39016 and MIL-PRF-28776 specifications, under the supervision of the Italian Ministry of Defence "TELEDIFE"; furthermore manufactures some of its products in total compliance to MIL-R-5757 and MIL-R-39016 specifications. The part following is a cross reference calling for the suggested equivalence between the Military Designation, the Nuova Hi-G Italia part number and, where available the CECC specification. For the part number of CECC qualified relays, please use the CECC reference specification number or contact your sales area representative. Examples:

MILITARY DESIGNATION	N-HiG Part. No.

# TO-5 CASE RELAY

## DPDT

• Basic • Suppression • Suppression/Steering • Transistor Driven

Series  
MA

### Product Description

A series of ultra miniature hermetically sealed relays constructed in a transistor style case, providing superior performance and established reliability characteristics. Available in a variety of sensitivities, contact configurations and hybrid improvements to provide a most versatile element to the circuit designer.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame design and force / mass ratio provides exceptional shock and vibration immunity

Low Intercontact capacitance and contact circuit losses, provides also a reliable switching functions in demanding RF applications, combined with small size and low coil power dissipation (see figure 1).

### Series Types (note 2)

- **MA\*** Basic Relay, 2 form C, DPDT
- **MA\*D** Basic Relay combined with an internal diode for coil transient suppression
- **MA\*DD** Basic Relay incorporates two internal diodes for coil transient suppression and polarity reversal protection
- **MA\*T** Basic Relay incorporating an internal transistor driver and diode for coil transient suppression

**MIL-PRF-39016/9, 15 & 20**  
**MIL-PRF-28776/1**

### Environmental and Physical Specifications

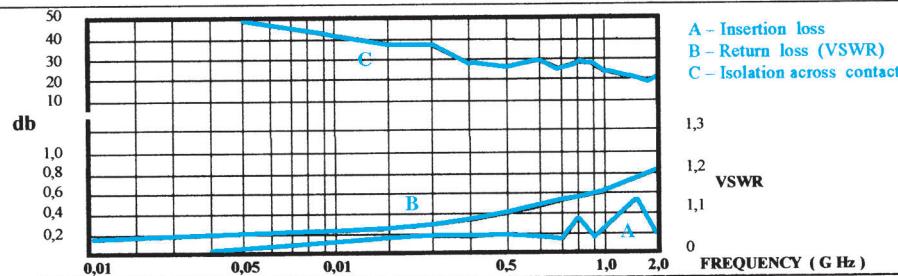

Temperature (Ambient)	-65°C to + 125°C
Shock	75 g's, 6 msec.
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz
Vibration (random)	0,4 g <sup>2</sup> s / Hz, 50 to 2000 Hz
Acceleration	50 g's
Sealing	All welded, Hermetic
Weight	0,09 oz. (2,55 grams) max.

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type Load	Contact Load	Cycles min.
(Note: All ratings with grounded case)	Low Level Resistive	10 to 50 µA / 10 to 50 mV 1 Amp / 28 Vdc 250 mA / 115 Vac, 60 and 400 Hz (Case not grounded) 100 mA / 115 Vac, 60 and 400 Hz	1.000.000 100.000 100.000 100.000
	Resistive overload	2 Amp / 28 V dc	100
	Inductive	200 mA / 28 Vdc (320 mH)	100.000
	Lamp	100 mA / 28 Vdc	100.000
Contact Resistance	0,1 ohm max. initial, 0,2 ohm max. after life		
Operate Time	2,0 msec. max.		
Release Time	1,5 msec. max. Series: MA*	4,0 msec. max. Series: MA*D, MA*DD	7,5 msec. max. Series MA*T
Contact Bounce	1,5 msec. max.		
Contact stabilisation Time	2,0 msec. max.		
Dielectric Strength	500 Vrms min., 60 Hz, all points at sea level	125 Vrms min. 60 Hz, all points at 70.000 ft.	
Insulation Resistance	10.000 megohms min. all points at 500 Vdc		
Intercontact Capacitance	0,7pF typical		
Sensitivity	130 milliwatts at pick-up, 450 milliwatts at nominal rated coil voltage, at 25 °C		
Diode P.I.V.	100 Vdc min. Series : MA*D, MA*DD, MA*T		
Negative Coil Transient	1,0 Vdc max. Series : MA*D, MA*DD, MA*T		
Transistor Characteristics	Emitter-Base Voltage (Vebo)	6,0 Vdc min.	
at 25 °C	Collector-Base Breakdown Voltage (Vcbo) (Ic = 100µ A)	80 Vdc min.	
(Series MA*T)	Base Turn-Off Voltage	0,3 Vdc min.	

Figure 1 - Radio Frequency Curves

Note:  
Radio frequency curves are typical characteristics based on factory knowledge. Tests to ensure compliance on RF performance, are not performed.

### Outline Dimensions

Note :

- Dimensions are shown in inches (millimetres)
- Terminal Variants: - (C) Standard Wire Terminal = .500 (12,7) min.  
- (W) Long Wire Terminal = 1.500 (38,1) min.  
- (P) Pin Terminal = .187 ± .01 (4,75 ± 0,25)

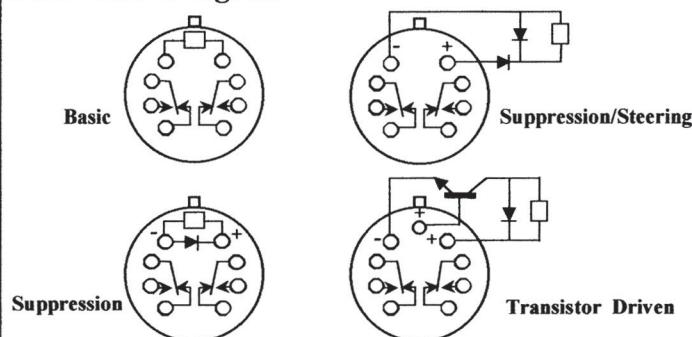

### Terminal Locations

Note :

- dimensions are shown in inches (millimetres)
- Viewed from terminals, numbers are for reference only
- Ground pin is optional

### Schematic Diagram

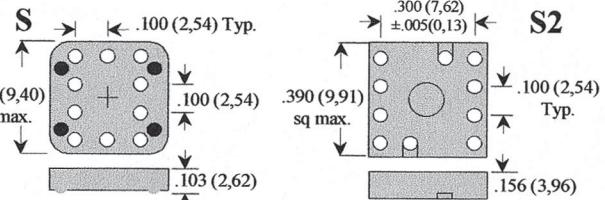

Note : Schematics are viewed from terminals

### Spreader Pads

Relays can be supplied with a spreader pad epoxied to the relay header, to prevent the possible shorting of printed circuit board land lines and to facilitate circuit board cleaning. To order relay with pad add. " S " to part Number.

Example : MAWD - 26AS

Note : - Dimensions are in inches (millimetres)

- Pad type S2 is not used on military qualified MA\*T series

### Note:

1 For qualified relays add. " I " and the applicable suffix for Failure Rate designation.

Example: I MAWD - 26A

2 " \* " Indicates Terminal Variants: C, P or W

3 Failure Rate ( Reliability Level )

Military Suffix	NHIG Suffix	F R %/10.000 cycles
L	A	3,0
M	B	1,0

### How to Order, (note 1) (Part Numbering System)

Series	MA	W	D	G	- 26	A	S	Spreader Pad (optional)

A series of ultra miniature hermetically sealed relays constructed in a transistor style case, providing superior performance and established reliability characteristics. Available in a variety of sensitivities, contact configurations and hybrid versions to provide a most versatile element to the circuit designer.

The following construction features ensure the high reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame design and force / mass ratio provides exceptional shock and vibration immunity

Low Intercontact capacitance and contact circuit losses, provides also a reliable switching functions in demanding RF applications, combined with small size and low coil power dissipation (see figure 1).

**Series Type**  
- MS2      2 form C, DPDT

## Environmental and Physical Specifications

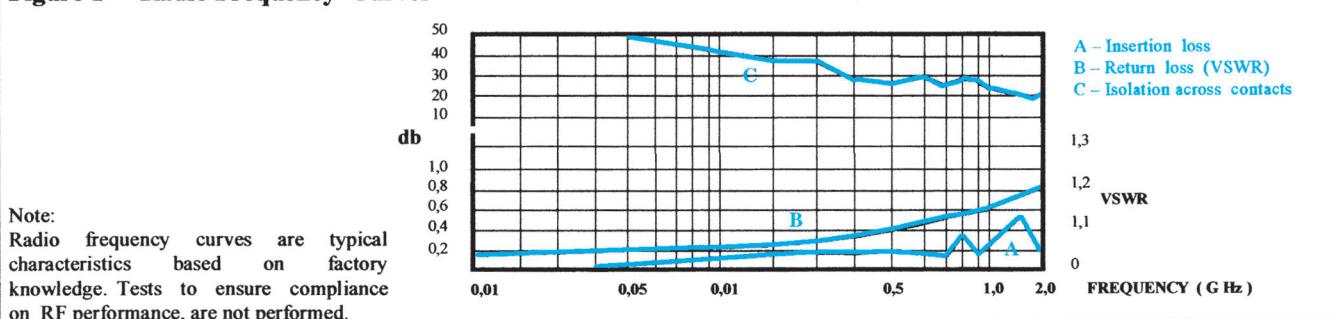

Temperature (Ambient)	-65°C to + 125°C
Shock	75 g's, 6 msec., half sine wave
Vibration (sinusoidal)	30 g's, 10 to 2000 Hz, 1,5 amplitude peak
Bump	40 g's, 6 msec.,
Sealing	All welded, Hermetic
Weight	0,15 oz. (4,25 grams) max.
Finish	Bright tin lead plated terminations and case

## Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type Load	Contact Load	Cycles min.
(Note : All ratings with grounded case)	Low Level	10 mA / 30 mV	1.000.000
	Resistive	1 Amp / 28 Vdc,	100.000
	Resistive Overload	2 Amp / 28 Vdc	100
	Inductive	0,1 Amp / 28 Vdc (320 mH)	100.000
Contact Resistance	0,1 ohm max. initial, 0,2 ohm max after life		
Operate Time	4,5 msec. max.		
Release Time	2,5 msec. max.		
Contact Bounce	2,0 msec. max.		
Dielectric Strength	500 Vrms min., 60 Hz, all points at sea level		
Insulation Resistance	10.000 megohms min. all points at 500 Vdc		
Intercontact Capacitance	0.7 pF typical		
Sensitivity	60 milliwatts at pick-up, 250 milliwatts, at nominal rated coil voltage, at 25 °C

### Product Description

A series of ultra miniature hermetically sealed relays constructed in a transistor style case, providing superior performance and established reliability characteristics. Available in a variety of sensitivities, contact configurations and hybrid versions to provide a most versatile element to the circuit designer.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 1 form C, SPDT contacts, special metal alloy with gold plating
- Frame design and force / mass ratio provides exceptional shock and vibration immunity

Low Intercontact capacitance and contact circuit losses, provides also a reliable switching functions in demanding RF applications, combined with small size and low coil power dissipation (see figure 1).

### Series Types (note 2)

- |          |  |
|----------|--|
| - 1MA*   | Basic Relay, 1 form C, SPDT  |
| - 1MA*D  | Basic Relay combined with an internal diode for coil transient suppression                                   |
| - 1MA*DD | Basic Relay incorporates two internal diodes for coil transient suppression and polarity reversal protection |
| - 1MA*T  | Basic Relay incorporating an internal transistor driver and diode for coil transient suppression             |

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	75 g's, 6 msec.
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz
Vibration (random)	0.4 g²/s / Hz, 50 to 2000 Hz
Acceleration	50 g's
Sealing	All welded, Hermetic
Weight	0,08 oz. (2,27 grams) max.

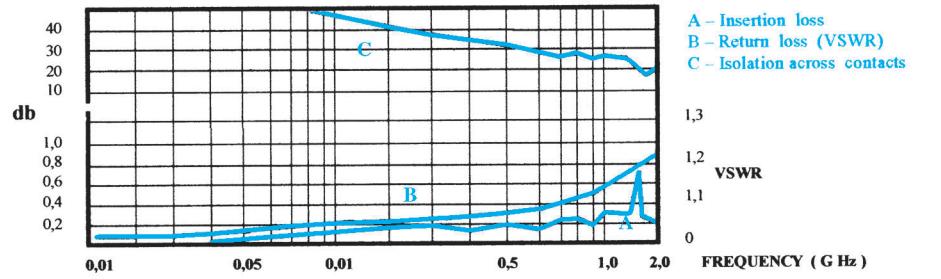

MIL-PRF-39016/7, 23 & 24  
MIL-PRF-28776/5

### Electrical Characteristics (over the Temperature range. Unless otherwise noted)

Coil Data	See Typical Characteristics chart

### Outline Dimensions

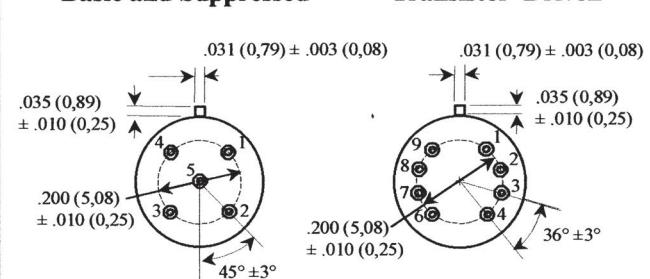

Note : - Dimensions are shown in inches (millimetres)

- Terminal Variants: - (C) Standard Wire Terminal = ,500 (12,7) min,
- (W) Long Wire Terminal = 1,500 (38,1) min,
- (P) Pin Terminal = ,187 ± ,010 (4,75 ± 0,25)

### Terminal Locations

#### Basic and Suppressed

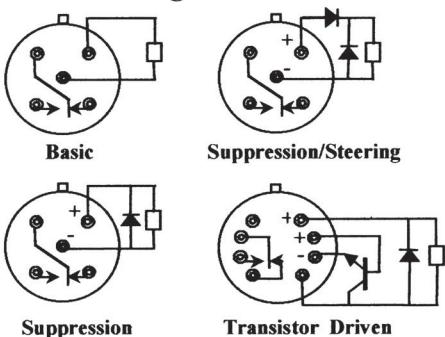

Note :

- Dimensions are shown in inches (millimetres)
- Viewed from terminals, numbers are for reference only

#### Transistor Driven

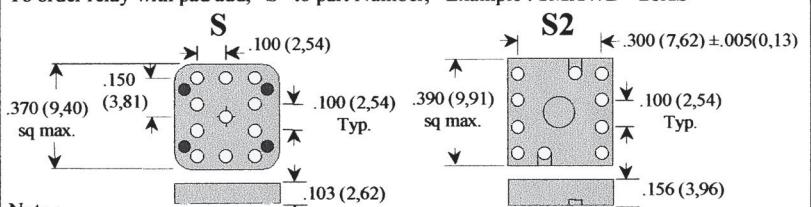

### Schematic Diagrams

Note : Schematics are viewed from terminals

### Spreader Pads

Relays can be supplied with a spreader pad epoxied to the relay header, to prevent the possible shorting of printed circuit board land lines and to facilitate circuit board cleaning. To order relay with pad add, "S" to part Number, Example : 1MAWD - 26AS

Note :

- Dimensions are in inches (millimetres)
- Pad Type S2 is not used on military qualified relays. It is used only on series: 1MA\*T
- Pad Type S is used on series: 1MA\*, 1MA\*D, 1MA\*DD, 1MA\*T

### Note:

1 For qualified relays add. " I " and the applicable suffix for Failure Rate designation.

Example: 1MAWD - 26A

2 " \* " Indicates Terminal Variants: C, P or W

3 Failure Rate ( Reliability Level )

Military Suffix	NHIG Suffix	F R %/10.000 cycles
L	A	3,0
M	B	1,0

# •100 GRID TERMINAL RELAY DPDT

• Basic • Suppression • Suppression/Steering

Series  
MGA

## Product Description

A series of ultra miniature hermetically sealed relays with .100 inch grid spaced terminations. These relays are similar to MA series TO-5 relays construction.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- SMD terminal style available
- Frame design and force / mass ratio provides exceptional immunity to shock and vibration

Low Intercontact capacitance and contact circuit losses, provides also a reliable switching function in demanding RF applications, combined with small size and low coil power dissipation (see figure 1).

## Series Types (note 2)

- MGA\* Basic Relay, 2 form C, DPDT
- MGA\*D Basic Relay combined with an internal diode for coil transient suppression
- MGA\*DD Basic Relay incorporates two internal diodes for coil transient suppression and polarity reversal protection

## Environmental and Physical Specifications

Temperature (Ambient)	-65°C to +125°C
Shock	75 g's, 6 msec.
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz
Vibration (random)	0,4g <sup>2</sup> /s, 50 to 2000 Hz
Acceleration	50 g's
Sealing	All welded, Hermetic
Weight	0.09 oz. (2.55 grams) max.

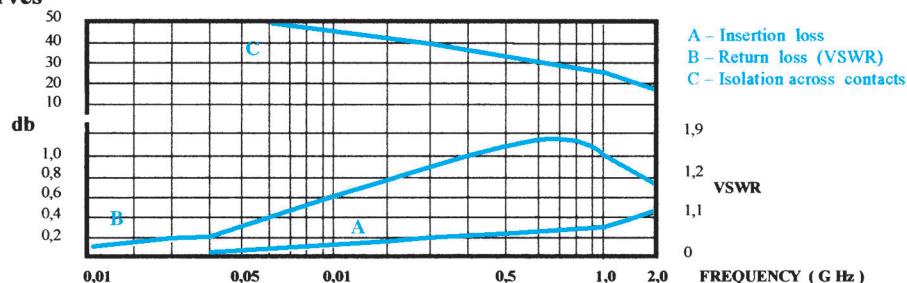

MIL-PRF-39016/17, 18 & 19

## Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics table		
Contact Rating	Type Load	Contact Load	Cycles min.
(Note: All ratings with grounded case)	Low Level Resistive	10 to 50 µA / 10 to 50 mV 1 Amp / 28 V dc 250 mA / 115 Vac, 60 and 400 Hz (case not grounded) 100 mA / 115 Vac, 60 and 400 Hz	1.000.000 100.000 100.000 100.000
	Resistive overload	2 Amp / 28 V dc	100
	Inductive	200 mA / 28 V dc (320 mH)	100.000
	Lamp	100 mA / 28 Vdc	100.000
Contact Resistance	0,1 ohm max. initial, 0,2 ohm max after life		
Operate Time	2,0 msec. max.		
Release Time	1,5 msec. max.	Series: MGA*	4,0 msec. max. Series: MGA*D, MGA*DD
Contact Bounce	1,5 msec. max.		
Contact stabilisation Time	2,5 msec max		
Dielectric Strength	500 Vrms min., 60 Hz, all points at sea level		
Insulation Resistance	10.000 megohms min. all points at 500 Vdc		
Intercontact Capacitance	0,4 pF typical		
Sensitivity	130 milliwatts at pick-up, 500 milliwatts at nominal rated coil voltage at 25 °C		
Diode P.I.V.	100 Vdc min. Series : MGA*D, MGA*DD		
Negative Coil Transient	1,0 Vdc max. Series: MGA*D, MGA*DD		

Figure 1 - Radio Frequency Curves

Note:

Radio frequency curves are typical characteristics based on factory knowledge. Tests to ensure compliance on RF performance, are not performed.

## Outline Dimensions

### Note:

- Dimensions are shown in inches (millimetres)
- Terminal Variants: - (C) Wire Terminal = .500 (12,7) min.
- (P) Pin Terminal = .187 ± .01 (4,75 ± 0,25)

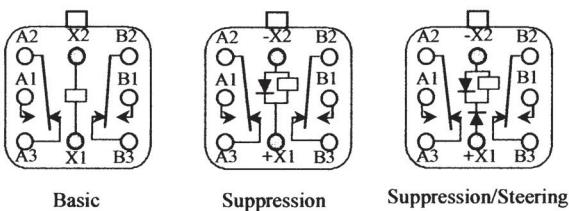

## Terminal Locations

### Note :

- Viewed from terminals
- Ground pin is optional
- Dimensions are shown in inches (millimetres)

## Schematic Diagrams

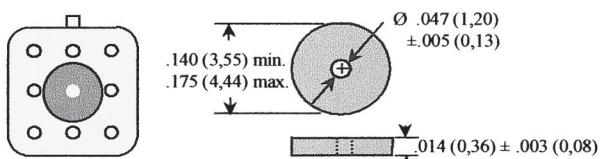

### Note:

Schematics are viewed from terminals, numbers are for references only

## Mounting Pad

Relays can be supplied with a mounting pad epoxied to the relay header, to prevent the possible shorting of printed circuit board land lines and to facilitate circuit board cleaning. To order relay with pad add. W to part Number. Example : MGACD-26W

Note : Dimensions are in inches (millimetres)

### Note:

1 For qualified relays add. " I " and the applicable suffix for Failure Rate designation.  
Example: I MGACD - 26A

2 " \* " Indicates Terminal Variants: C, P or S

3 Failure Rate ( Reliability Level )

Military Suffix	NHIG Suffix	F R %/10.000 cycles
L	A	3,0
M	B	1,0

## How to Order. (note 1) (Part Numbering System)

Series	MGA	C	D	G	-26	A	W	Mounting Pad (optional)
C - Wire Terminal								Reliability levels A or B (note 3)
P - Pin Terminal								Coil Voltage code
S - SMD Terminal								Ground Pin (optional)

D - Diode Suppression								
DD - Suppression / Steering								

# •100 GRID TERMINAL RELAY

## DPDT

• Basic • Suppression

Series  
MGA2

### Product Description

A series of ultra miniature hermetically sealed relays with .100 inch grid spaced terminations. These relays are similar to MA series TO-5 relays construction.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame design and force / mass ratio provides exceptional immunity to shock and vibration

Low Intercontact capacitance and contact circuit losses, provides also a reliable switching function in demanding RF applications, combined with small size and low coil power dissipation (see figure 1).

### Series Types

- MGA2 Basic Relay, 2 form C, DPDT
- MGAD2 Basic relay combined with an internal diode for coil suppression

### Environmental and Physical Specifications

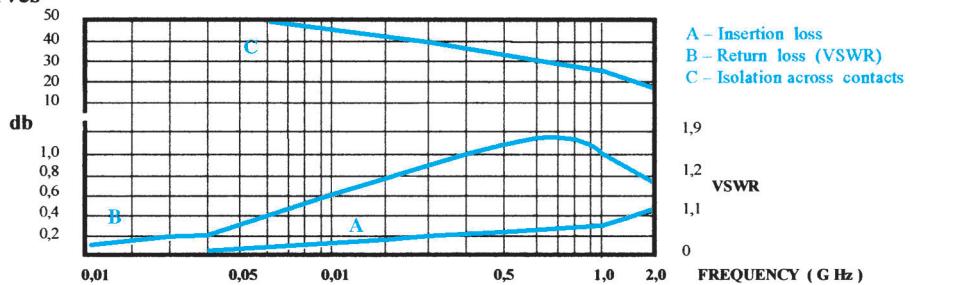

Temperature (Ambient)	-65°C to + 125°C
Shock	100 g's, 6 msec., half sine wave
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz, 2,5 peak amplitude
Vibration (random)	0,2 g²/s/Hz, 20 to 2000 Hz
Bump	40 g's, 6 msec., half sine wave
Sealing	All welded, Hermetic
Weight	0,09 oz. (2,55 grams) max.
Finish	Bright tin lead plated terminations and case

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

## Product Description

A series of ultra miniature hermetically sealed relays constructed in a transistor style case, providing superior performance and established reliability characteristics. Designed for high density PCB mounting is available in a variety of sensitivities. Contact configurations and material improvements to provide a most versatile element to the circuit designer especially for resistive load rated at 2 amperes.

The following construction features ensure the highest reliability in extreme environments :

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- 500 mA to 2 Amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame design and force / mass ratio provides exceptional shock and vibration immunity

## Series Type

- MCA      2 form C, DPDT

## Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	75 g's, 6 msec., half sine wave
Vibration (sinusoidal)	30 g's, 10 to 2000 Hz, 1.5 amplitude peak
Sealing	All welded, Hermetic
Weight	0,09 oz. (2,55 grams) max.
Finish	Bright tin lead plated terminations and case

## Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type Load	Contact Load	Cycles min.
(Note : All ratings with grounded case)	Resistive	500 mA to 2 Amp / 28 Vdc (note 1) 500 mA / 115 Vac, 60 and 400 HZ (case not grounded) 250 mA / 115 Vac, 60 and 400 HZ	100.000 50.000 50.000
	Resistive Overload	2,5 A / 28 Vdc	100
	Inductive	280 mA / 28 Vdc (320 mH)	50.000
Contact Resistance	0,2 ohm max. initial, 0,35 ohm max after life		
Operate Time	3,5 msec. max. at 25°C		
Release Time	2,5 msec. max. at 25°C		
Contact Bounce	2,0 msec. max. at 25°C		
Dielectric Strength	500 Vrms min., 60 Hz, all points, at sea level		
Insulation Resistance	10.000 megohms min. all points at 500 Vdc		
Sensitivity	150 milliwatts at pick-up, 500 milliwatts at nominal rated coil voltage at 25 °C		

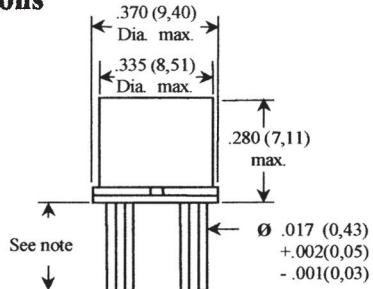

# TO-5 CASE RELAY DPDT, HIGH CURRENT

Series

## Outline Dimensions

### Note :

- Dimensions are shown in inches (millimetres)
- Terminal Variants: - (C) Standard Wire Terminal = .500 (12,7) min.
- (W) Long Wire Terminal = 1.500 (38,1) min.
- (P) Pin Terminal = .187 ± .01 (4,75 ± 0,25)

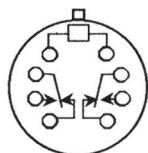

## Terminal Locations

### Note:

- Dimensions are shown in inches (millimetres)
- Viewed from terminals, numbers are for reference only

## Schematic Diagram

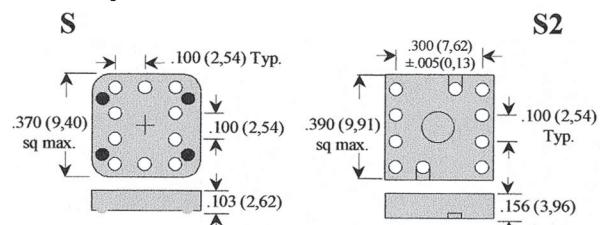

### Note :

- Schematics are viewed from terminals.

## Spreader Pads

Relays can be supplied with a spreader pad epoxied to the relay header, to prevent the possible shorting of printed circuit board land lines and to facilitate circuit board cleaning. To order relay with pad add. " S " to part number. Example: MCAW-26S

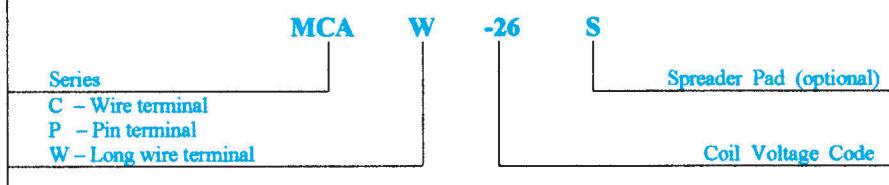

Note : - Dimensions are in inches (millimetres)

### Note:

- 1 Not suitable for use below 500 mA resistive

## How to Order (Part Numbering System)

# .100 GRID TERMINAL RELAY

## DPDT

• Basic • Suppression • Suppression/Steering

Series  
MGAE

### Product Description

A series of ultra miniature hermetically sealed relays with .100 inch grid spaced terminations. These relays are similar to MA series TO-5 relays construction and are provided for the operation in military and/or commercial equipment and/or installations with increased mechanical and environmental requirements. The following construction methods ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame design and force / mass ratio provides exceptional immunity to shock and vibration

Low Intercontact capacitance and contact circuit losses, provides also a reliable switching function in demanding RF applications, combined with small size and low coil power dissipation (see figure 1).

### Series Types

- MGAE Basic Relay, 2 form C, DPDT
- MGAED Basic relay combined with an internal diode for coil suppression
- MGAEDD Basic Relay incorporates two internal diodes for coil transient suppression and polarity reversal protection

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	75 g's, 6 msec., half sine wave
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz, 2,0 peak amplitude
Vibration (random)	0,2 g's/Hz, 20 to 2000 Hz
Bump	40 g's, 6 msec., half sine wave
Sealing	All welded, Hermetic
Weight	2,55 grams (0,09 oz.) max.
Finish	Case: bright tin lead plated Terminations: bright tin lead and gold plated

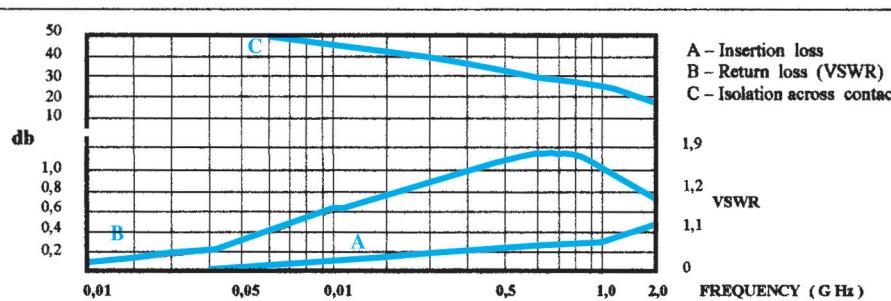

CECC 16207-801

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

# HALF SIZE CRYSTAL CAN RELAY

## 2 AMPERE DPDT

Series  
I2K

### Product Description

A complete series of half crystal can hermetically sealed relays manufactured and qualified to the referenced Military specification.

The leading relay design in military and commercial application is represented in Nuova Hi-G Italia I 2K series relay. The products advanced design provides superior performance in the environmental and operational requirements of today's sophisticated equipment.

Volume production coupled with continuing qualification programs, ensure product consistency and the highest degree of reliability.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional immunity to shock and vibration.

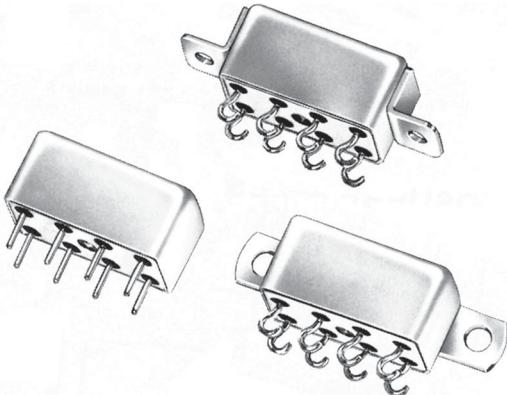

### Series Type

- I 2K      2 form C, DPDT

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz
Vibration (random)	0,4g <sup>2</sup> / Hz, 50 to 2000 Hz
Acceleration	50 g's
Sealing	All welded, Hermetic
Weight	0,46 oz. (13,0 grams) max.

MIL-PRF-39016/6

## 2 AMPERE DPDT

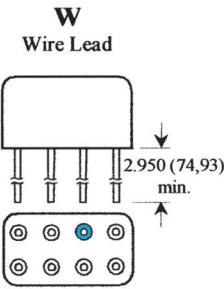

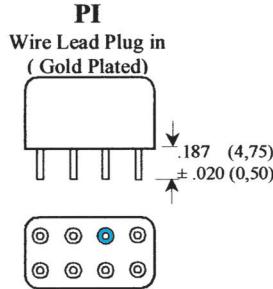

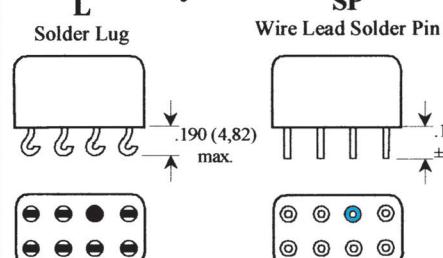

Series  
2K

### Typical Characteristics (over the Temperature range, unless otherwise noted)

Voltage Code	Coil Voltage Vdc Nominal	Coil Resistance ohms Max.	Pick-up Vdc Max. at 25 °C	Drop-out Vdc Min. at 25 °C
105	5,0	6,0	39	3,7
106	6,0	7,2	40	3,3
112	12,0	14,2	160	6,5
124	24,0	29,0	870	17,5
126	26,5	32,0	700	13,5
136	36,0	43,0	1960	26,0
148	48,0	57,0	3480	35,0

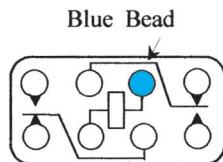

### Terminal Styles

#### Note :

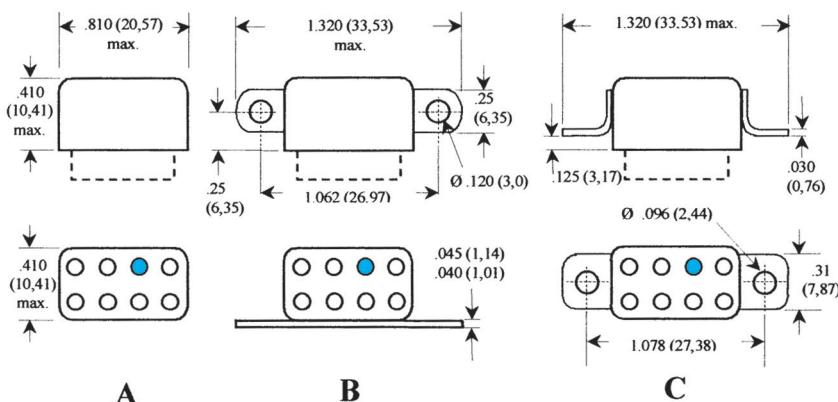

- Dimensions are shown in inches (millimetres)
- Terminal spacing is .200 (5,08). Terminal diameter is .030 (0,76) + .003 (0,07) - .002 (0,05)

### Schematic Diagram

Note : - Schematic are viewed from terminals

### Mounting Styles

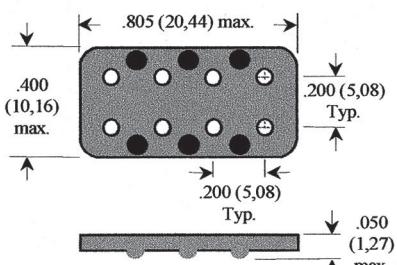

#### Note :

- Dimensions are shown in inches (millimetres)

### Insulating Pads

Relays can be supplied with an insulating pad epoxied to the relay header, to prevent the possible shorting of printed circuit board land lines and to facilitate circuit board cleaning. To order relay with pad add P to part Number. Example : 2K-2A-126 P

Note:  
-Dimensions are shown in inches (millimetres)

## 2 AMPERE DPDT

Series  
2K-6600

### Product Description

A complete series of half crystal can hermetically sealed relays manufactured and qualified to the referenced CECC specifications. The leading relay design in military and commercial application is represented in Nuova Hi-G Italia 2K-6600 series relay. The product advanced design provides superior performance in the environmental and operational requirements of today's sophisticated equipment. Volume production coupled with continuing qualification programs, ensure product consistency and the highest degree of reliability.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional immunity to shock and vibration.

### Series Type

- 2K-6600 2 form C, DPDT

Contact Category		
Code	Light duty contact	Types
01	0,01 mA, 5 V dc max.	007, 014, 021
02	0,01 mA, 0,01 V dc max.	021

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to +125°C
Shock	50 g's, 11 msec., half sine wave
Vibration (sinusoidal)	20 g's, 10 to 2000 Hz, 1,5 amplitude peak
Bump	40 g's, 6 msec.,
Sealing	All welded, Hermetic
Weight	0,46 oz. (13 grams) max.
Finish FRENCH	Bright tin lead plated terminals and case

NOTE: -007 ITALIAN FACTORY SPEC.  
-014 GERMAN / FRENCH FACTORY SPEC.  
-021 UK FACTORY SPEC.

Apart from the range and a few environmental tests, all specs. are identical. Nuova HiG Italia is the only Company qualified to each/all country specs.

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type Load	Contact Load	Cycles min.
(Note : All ratings with grounded case)	Low Level Resistive Overload Inductive	10 mA / 30 mV max. 2 Amp / 28 Vdc, 4 Amp / 28 Vdc 0,75 Amp / 28 Vdc (200 mH)	1.000.000 100.000 100 100.000
Contact Resistance	0,05 ohm max. initial, 0,2 ohm max after life		
Operate Time	4,0 msec. max. at 25°C		
Release Time	4,0 msec. max. at 25°C		
Contact Bounce	2,5 msec. max. at 25°C		
Dielectric Strength	500 Vrms min., 60 Hz, all points at sea level		
Insulation Resistance	1000 megohms min. all points at 500 Vdc		
Intercontact Capacitance	2.5 pF typical		
Sensitivity	250 milliwatts max. ,at pick-up, 1 watt max., at nominal rated coil voltage at 25 °C

## 2 AMPERE DPDT

coil transient Suppressed

Series  
2K-7940

### Product Description

A complete series of half crystal can hermetically sealed relays manufactured in compliance to the referenced Military specification.

The leading relay design in military and commercial application is represented in Nuova Hi-G Italia 2K-7940 series relay. The product advanced design provides superior performance in the environmental and operational requirements of today's sophisticated equipment.

This series type provide a coil transient suppression by a second coil in short-circuit.

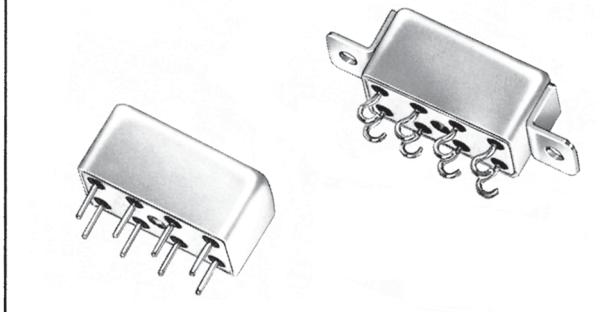

The following construction features ensures the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- low level to 2 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional shock and vibration immunity

### Series Type

- 2K-7490 2form C, DPDT

COMPLIANT TO  
MIL-R-39016/22

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	30 g's, 10 to 3000 Hz
Vibration (random)	0,4g <sup>2</sup> / Hz, 50 to 2000 Hz
Acceleration	50g's
Sealing	All welded, Hermetic
Weight	0,46 oz. (13,0 grams) max.

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

Series

Dash number (see characteristics table)

Reliability levels A or B (note2)

Note: Relays compliant to MIL-R-39016/22 are designated 2K-7940 and Applicable dash numbers coincide with N Hi-G Italia dash numbers

# HALF SIZE CRYSTAL CAN RELAY

## 2 AMPERE SENSITIVE

Series  
KA

### Product Description

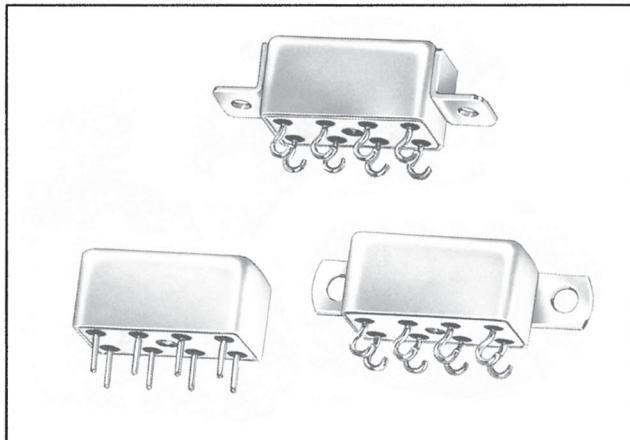

Innovation and versatility of design has allowed Nuova Hi-G Italia to achieve this improved sensitivity of our basic military qualified product. The product reflects an improved magnetic circuit powering our standard contact structure to levels of 2 amperes. The internal structures reflect and conform to the latest military specifications and are supported by a continuing qualification program. Product performance, reliability and sensitivity are reflected in this unique device and provide the design engineer with a tool for improved circuit design.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional immunity to shock and vibration.

### Series Type

- 2KA      2 form C, DPDT

### Environmental and Physical Specifications

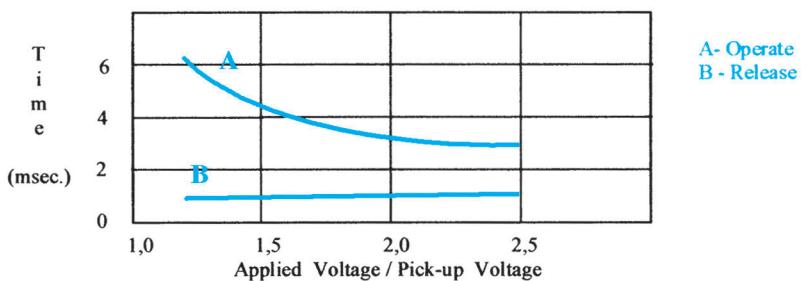

Temperature (Ambient)	-65°C to + 125°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	20 g's, 10 to 2000 Hz
Acceleration	30 g's
Sealing	All welded, Hermetic
Weight	0,35 oz. (10,0 grams) max.

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

# HALF SIZE CRYSTAL CAN RELAY

## 5 AMPERE DPDT

Series  
HA

### Product Description

A proven variation of our standard half size crystal can relay incorporates improved current carrying paths to provide 5 ampere switching.

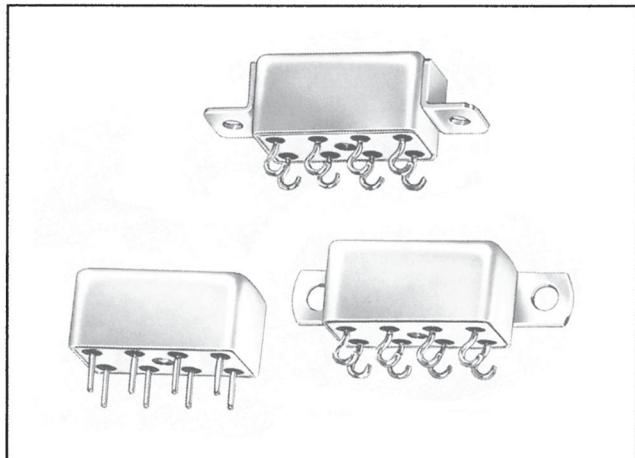

The design is supported by our standard qualified military relays and their continued testing programs, together with the latest metallurgical innovations in contact materials and current carrying members. Reliability, product consistency and low cost are maintained through our volume production techniques.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- 5 Amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional immunity to shock and vibration.

### Series Type

- 2HA      2 form C, DPDT

## 2 AMPERE DC or AC COIL

Series  
B

### Product Description

This standard size crystal can relay series, offers switching capability of low level signals up 2 amperes under the most extreme environmental conditions.

The following construction features ensure the highest reliability in extreme environments:

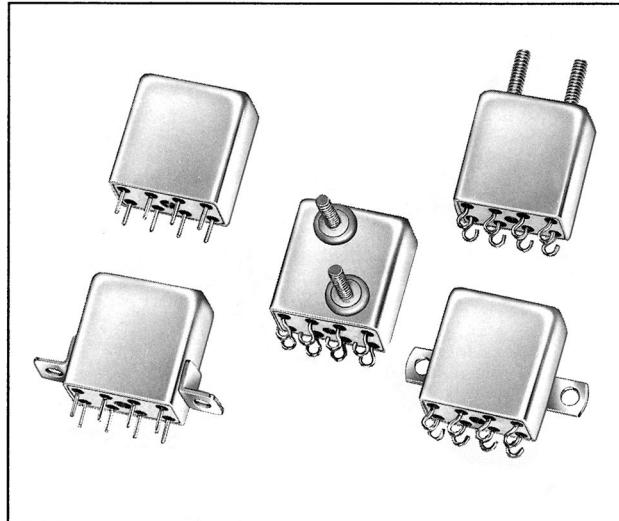

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating
- DC and AC coil

### Series Types

- 2B Basic Relay, 2 form C, DPDT
- 2BR Basic Relay with an internal bridge diode, for AC operation

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to +125°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	20 g's, 10 to 2000 Hz
Acceleration	50 g's
Sealing	All welded, Hermetic
Weight	1 oz. (28,35 grams) max.

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type load	Contact Load	Cycles min.
(Note : All ratings with grounded case)	Low Level Resistive	10 mA / 30 mV	1.000.000

# FULL SIZE CRYSTAL CAN RELAY SENSITIVE 25,40 and 100 MILLIWATT

Series  
BS

## Product Description

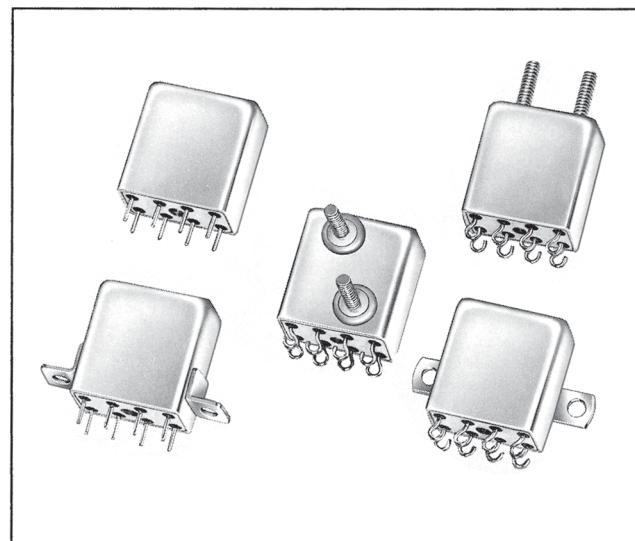

This ultra sensitive full size crystal can relay series, offers switching capability of low level signals up 2 amperes under the most extreme environmental conditions. It's low coil sensitivity and high contact current carrying capacity makes these relays ideal for a variety of applications. In a unique design, motor efficiency and the proven contact structure of qualified relays, offer sensitivities from 25 milliwatts with low level switching to 2 amperes. Low profile, proven designs and wide selection of coil values provide the designer with a consistent high quality product for today's and tomorrow design. These series replace the previous BA, BC and BK series.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. switching
- 1 or 2 form C, SPDT or DPDT contacts, special metal alloy with gold plating

## Series Types

- 2BSA 2 form C, DPDT, 100 milliwatts sensitivity
- 1BSK 1 form C, SPDT, 25 milliwatts sensitivity
- 2BSK 2 form C, DPDT, 40 milliwatts sensitivity

## Environmental and Physical Specifications

<b>Temperature (Ambient)</b>	-65°C to +125°C
<b>Shock</b>	100 g's, 6 msec.
<b>Vibration (sinusoidal)</b>	20 g's, 10 to 2000 Hz
<b>Acceleration</b>	30 g's
<b>Sealing</b>	All welded, Hermetic
<b>Weight</b>	1 oz. (28,35 grams) max.

## 5 AMPERE

Series  
BN

### Product Description

An innovation in design with emphasis on material technology developments have allowed NHG to manufacture this high sensitivity 5 amperes crystal can relay. The selection of contacts and all current currying parts, have resulted in this highly reliable, sensitive, fully hermetically sealed relay.

This relay meets all the switching and environmental conditions of demanding military environments.

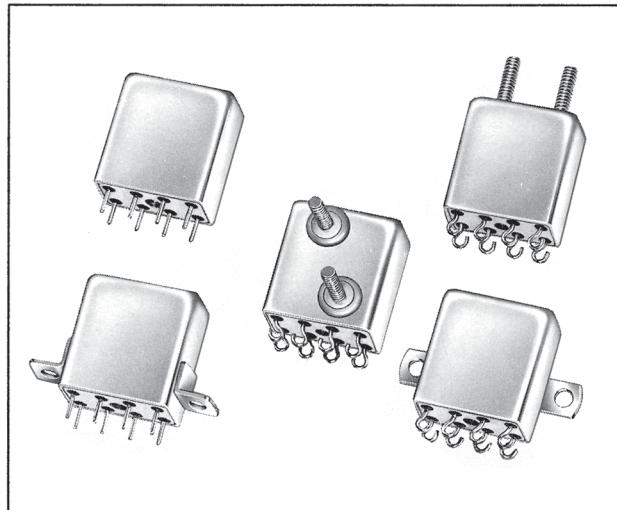

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- 5 amp. switching
- Contacts, special metal alloy with gold plating

### Series Types

- 1BN 1 form C, SPDT
- 2BN 2 form C, DPDT

### Environmental and Physical Specifications

# FULL SIZE CRYSTAL CAN RELAY 5 AMPERE SENSITIVE

Series  
BCN

## Product Description

An innovation in design with emphasis on material technology developments have allowed NHG to manufacture this high sensitivity 5 amperes crystal can relay. The selection of contacts and all current carrying parts, have resulted in this highly reliable, sensitive, fully hermetically sealed relay. This relay meets all the switching and environmental conditions of demanding military environments.

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- 5 amp. switching
- Contacts, special metal alloy with gold plating

# FOUR POLE CRYSTAL CAN RELAY 2 AMPERE

Series  
4B

## Product Description

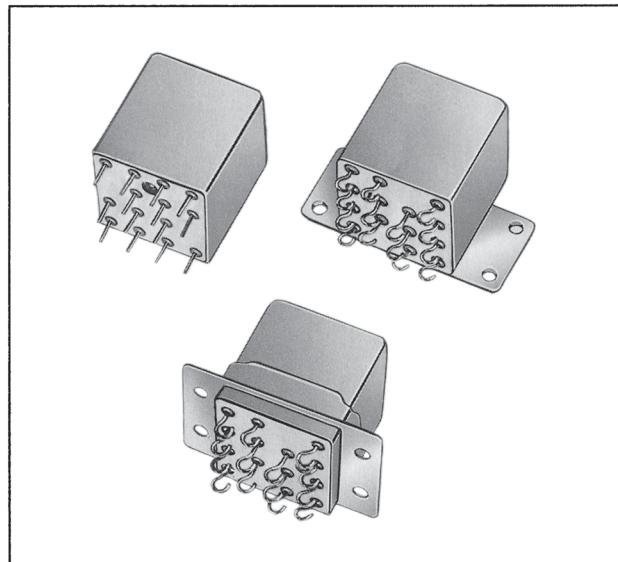

A four pole relay design, compatible with the popular 0.2 grid pin spacing. The design employs a common actuator system to each of the four double pole, double throw contacts, and provides reliable simultaneous operation of each pole. Powered by a wide latitude of coil resistance providing sensitivity of 100 milliwatts per contacts. Switching capabilities from low level to 2 amperes. Environmental stability to the extreme temperatures.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. switching
- 4 form C, 4PDT contacts, special metal alloy with gold plating

## Series Type

- 4B      4 form C, 4PDT

# CRYSTAL CAN RELAY 10 AMPERE DC or AC COIL

Series  
**T**

## Product Description

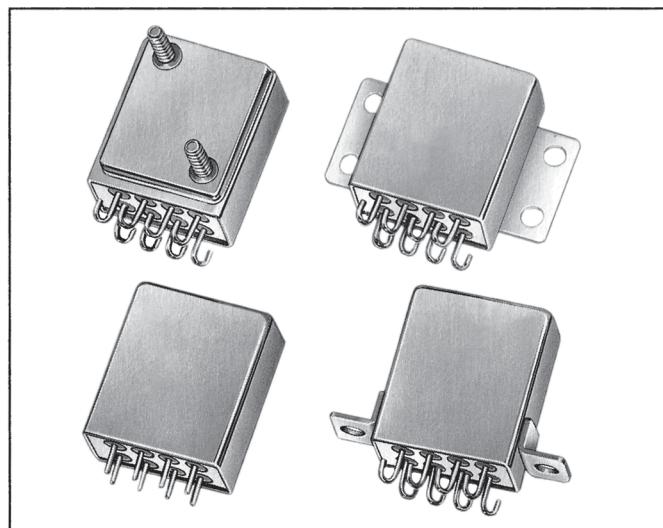

The economical approach to high current switching in a relay design for commercial and military applications. Through unique design innovations, this device incorporates an optimised magnetic structure and massive contact switching paths in less than 0.65 cubic inches. With proven switching characteristics of 10 amperes in excess of 100.000 operations under all environments, it performs in a wide variety of switching applications.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- 10 Amp. switching
- 2 form C, DPDT contacts, special metal alloy with gold plating

## Series Types

- 2T Basic Relay, 2 form C, DPDT
- 2TR Basic Relay combined with internal bridge diode, for AC operation

## Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	20 g's, 10 to 2000 Hz
Acceleration	30 g's
Sealing	All welded, Hermetic
Weight	2 oz. (56,7 grams) max.

# HALF SIZE CRYSTAL CAN RADIO FREQUENCY RELAY 75 Watt

Series  
RFK

## Product Description

This series of coaxial terminated hermetically sealed relays have been designed to provide reliable switching functions in the most demanding radio frequency applications. The use of 2K relays in the basic construction, has been coupled with a unique and improved termination network to insure faultless performance under severe environmental conditions.

The design concepts employed in each of this series have been time tested through thousands of hours testing and millions of field operations to provide the highest degree of reliability.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. auxiliary switching
- 1 or 2 form C RF contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional shock and vibration immunity
- Coax interconnections
- 200 watt RF carry capability
- 75 watt RF switching capability
- Terminated with 6 inches length RG 196A/u Teflon cable

## Series Types

- RFK 1 form C, SPDT
- 2RFK 2 form C, DPDT

## Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 85°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	20 g's, 10 to 2000 Hz
Acceleration	30 g's
Sealing	All welded, Hermetic

## Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type load	Contact Load	Cycles min.
	Resistive	2 Amp / 28 Vdc (aux) 75 Watts RF Switching , 200 Watts carry (cold switching)	100.000 100.000
Contact Resistance	0,05 ohm max. initial aux. contact		
Operate Time	4,0 msec. max. at 25 °C		
Release Time	2,0 msec. max. at 25 °C		
Dielectric Strength	500 Vrms, 60 Hz, all mutually insulated points, at sea level		
Insulation Resistance	1000 megohms min. all points at 500 Vdc		
Sensitivity	250 milliwatts at pick-up, at 25 °C		

## Radio frequency Characteristics

Frequency range	0 to 500 MHz (derated characteristics to 1000 MHz)	Typical at 100 MHz	Typical at 500 MHz
Voltage Standing Wave Ratio (VSWR)	< 1.1 : 1	< 1.2 : 1	
Insertion Loss	0.16 dB	0.5 dB	
Crosstalk	50 dB	40 dB	
Power Switching	75 Watts	50 Watts	
Power Handling	200 Watts max.		
Characteristic Impedance	50 or 75 ohms	(other impedances available on special order)

# CRYSTAL CAN RADIO FREQUENCY RELAY 75 Watt

Series  
RFB

## Product Description

This series of coaxial terminated hermetically sealed relays have been designed to provide reliable switching functions in the most demanding radio frequency applications. The use of 2B relays in the basic construction, has been coupled with a unique and improved termination network to insure faultless performance under severe environmental conditions. The design concepts employed in each of these series has been time tested through thousands of hours testing and millions of field operations to provide the highest degree of reliability.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. auxiliary switching
- 1 or 2 form C RF contacts, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional immunity to shock and vibration.
- Coax interconnections
- 200 watt RF carry capability
- 75 watt RF switching capability
- Terminated with 6 inches length RG 196A/u Teflon cable

## Series Types

- RFB Basic Relay 1 form C, SPDT
- 2RFB Basic Relay 2 form C, DPDT

## Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 85°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	20 g's, 10 to 2000 Hz
Acceleration	30 g's
Sealing	All welded, Hermetic

## Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type load	Contact Load	Cycles min.
	Resistive	2 Amp / 28 Vdc (aux) 75 Watts RF Switching , 200 Watts carry (cold switching)	100.000 100.000
Contact Resistance	0,05 ohm max. initial aux. contact		
Operate Time	6,0 msec. max. at 25 °C		
Release Time	3,0 msec. max. at 25 °C		
Dielectric Strength	500 Vrms min., 60 Hz, all mutually insulated, at sea level		
Insulation Resistance	1000 megohms min. all points at 500 Vdc		
Sensitivity	250 milliwatts at pick-up, at 25 °C		

## Radio frequency Characteristics

Frequency range	0 to 500 MHz (derated characteristics to 1000 MHz)	
	Typical at 100 MHz	Typical at 500 MHz
Voltage Standing Wave Ratio (VSWR)	< 1.1 : 1	< 1.2 : 1
Insertion Loss	0.16 dB	0.5 dB
Crosstalk	50 dB	40 dB
Power Switching	75 Watts	50 Watts
Power Handling	200 Watts max.	
Characteristic Impedance	50 or 75 ohms (other impedances available on special order)	

# CRYSTAL CAN RADIO FREQUENCY RELAY 75 Watt

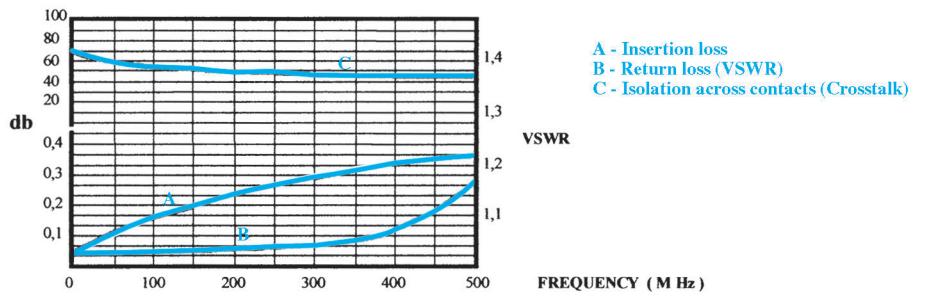

Series  
RFB

**Figure 1 - Radio Frequency curves**

Notes:

Typical characteristics are based on factory knowledge. Tests to ensure compliance, are not performed

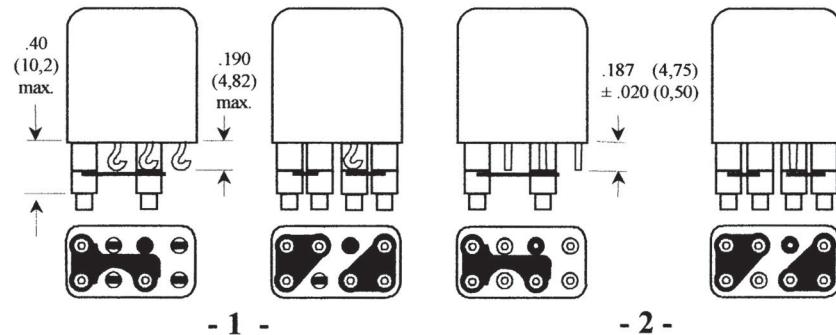

Values shown are in a 50 ohm impedance coaxial system

## Typical Characteristics (over the Temperature range, unless otherwise noted)

Voltage Code	Coil Voltage Vdc Nominal	Coil Voltage Vdc Max.	Coil Resistance ohms ± 10% at 25 °C	Pick-up Vdc Max. at 25 °C	Drop-out Vdc Min. at 25 °C
106	6,0	7,2	40	3,1	0,5
112	12,0	14,2	160	6,3	0,7
126	26,5	32,0	675	13,0	1,5
148	48,0	58,0	2500	25,0	2,5
176	76,0	90,0	5000	35,0	3,0

# CRYSTAL CAN RADIO FREQUENCY RELAY 75 Watt, 40 Milliwatt SENSITIVE

Series  
RFBC

## Product Description

This series of coaxial terminated hermetically sealed relays have been designed to provide reliable switching functions in the most demanding radio frequency applications. The use of 2BC relays in the basic construction, has been coupled with a unique and improved termination network to insure faultless performance under severe environmental conditions.

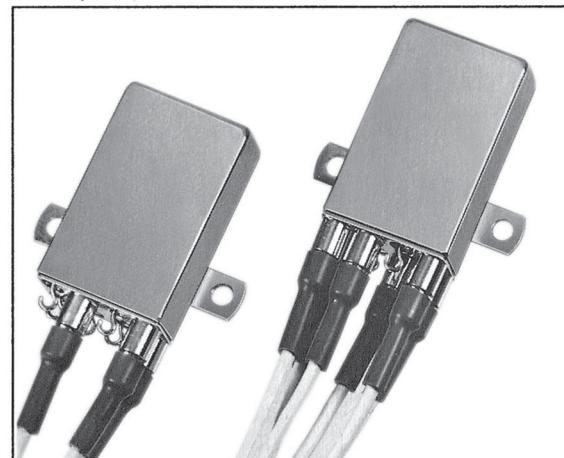

The design concepts employed in each of this series have been time tested through thousands of hours testing and millions of field operations to provide the highest degree of reliability.

The following construction features ensure the highest reliability in extreme environments:

- All welded relay construction
- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 2 amp. auxiliary switching
- 1 or 2 form C RF contact, special metal alloy with gold plating
- Frame, armature designs and force / mass ratio provides exceptional immunity to shock and vibration.
- Coax interconnections
- Terminated with 6 inches length RG 196A/u Teflon cable
- 200 watt RF carry capability
- 75 watt RF switching capability

## Series Types

- RFBC 1 form C, SPDT
- 2RFBC 2 form C, DPDT

## Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 85°C
Shock	100 g's, 6 msec.
Vibration (sinusoidal)	15 g's, 10 to 2000 Hz
Acceleration	30 g's
Sealing	All welded, Hermetic

## Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data	See Typical Characteristics chart		
Contact Rating	Type load	Contact Load	Cycles min.
	Resistive	2 Amp / 28 Vdc (aux) 75 Watts RF Switching , 200 Watts carry (cold switching)	100.000 100.000

# CRYSTAL CAN RELAY ASSY

## 1 AMPERE 4PDT DC COIL

Series  
4MA

### Product Description

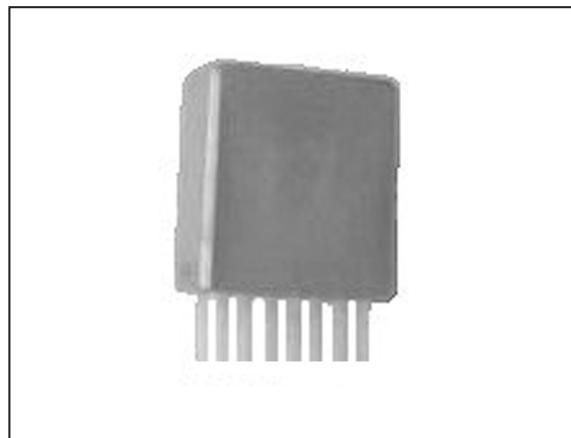

A relay assembly incorporating two MIL TO-5 relays in standard size crystal can relay that offers switching capability of low level signals up 1 ampere under the most extreme environmental conditions.

The following construction features ensure the highest reliability in extreme environments:

- Cleaning and sealing techniques ensures maximum internal cleanliness
- Low level to 1 amp. switching
- 4 form C, 4PDT contacts, special metal alloy with gold plating
- DC not polarised coil

### Series Type

- 4MA 4 form C, 4PDT

### Environmental and Physical Specifications

Temperature (Ambient)	-65°C to + 125°C
Shock	50 g's, 11 msec.
Vibration (sinusoidal)	15 g's, 10 to 2000 Hz
Acceleration	50 g's
Sealing	Hermetic, internally welded
Weight	1.2 oz. ( 34 grams)

### Electrical Characteristics (over the Temperature range, unless otherwise noted)

Coil Data		See Typical Charateristics chart		
Contact Rating		Type load	Contact load	Cycles min.
(Note: All ratings with grounded case)		Low Level	10 mA / 30 mV	1.000.000
		Resistive	1 Amp / 28 Vdc	100.000
		Overload	2 A / 28 Vdc	100
		Inductive	0.35 Amp / 28 Vdc (200 mH)	100.000
Contact Resistance		0,1 ohm max. initial		
Operate Time		4,0 ms. max. at 25 °C		
Release Time		2,0 ms. max. at 25 °C		
Contact Bounce		2,0 ms. max. at 25 °C		
Contact Simultaneously		Within 1 ms. above min. pick-up voltage		
Dielectric strength		500 Vrms min., 50 Hz, all points		
Insulation Resistance		500 Mohms min. all points at 500 Vdc		

### Typical Characteristics
